High School Degree

2016 - 2021

## SKILLS

Flask, Git, Java, Linux,  
Python, React, Spring Boot,  
SQL

## LANGUAGES

### Spanish:

Primary fluency

### English:

Full professional proficiency

## ABOUT ME

I am a computer enthusiast and researcher of new technologies. I enjoy delving into familiar areas, which allows me to develop my creativity and critical thinking. I am a quick learner, always willing to acquire new skills and knowledge to efficiently face technological challenges. Detail-oriented and committed, I like to do things right and make sure that each project is of the highest possible standard.

## PROJECTS

### Petshop Backend

Implementation of a secure and efficient system to manage products, users and orders, as well as a RESTful API for communication with the frontend.

**Skills:** Java, Spring Boot, JWT, MySQL

### Registration System for Universities

An integrated platform for educational institutions that streamlines administrative tasks such as course registration, subject management, enrollment, tracking, and payments. Its interconnected modules ensure efficient workflows, with unit testing for reliability.

**Skills:** Java, Spring Boot, Unit Testing

### Trilateration

Developing a trilateration solution that calculates the intersection of three circles based on their coordinates and radius, using mathematical algorithms to determine the precise location.

**Skills:** Java, Spring Boot

## EXPERIENCE

### Collections management

**Buerentals | July 2022 - June 2023**

- Responsible for contacting customers who have made reservations.
- Resolving questions from clients prior to their stay.
- Using Excel to manage and organize customer and reservation information.
- Effective communication with customers to ensure a satisfactory experience.
